PROFESSIONAL SUMMARY

Detail-oriented QA Fresher with hands-on experience in Manual Testing, API Testing, Database Testing (SQL). Skilled in designing Test Cases, Test Plans, Test Scenarios, and regression testing on real-world web applications. Familiar with SDLC, STLC, Agile/Scrum frameworks, and defect lifecycle management. Seeking an entry-level Software QA Analyst / Test Engineer role to deliver high-quality software through structured testing methodologies.

TECHNICAL SKILLS

Testing Types: Manual Testing | Functional Testing | Regression Testing | Smoke Testing | Sanity Testing | UAT | Black-Box Testing

Test Artifacts: Test Cases | Test Plan | Test Scenarios | Test Data | (RTM) Requirement Traceability Matrix | Bug Lifecycle | Boundary Value Analysis

API Testing: Postman | REST API Testing | JSON Validation | Status Code Validation | API Endpoint Testing | HTTP Methods

Database Testing:SQL Queries | MySQL | Database Testing | SELECT, INSERT, UPDATE, DELETE | Joins | WHERE Conditions

Methodologies:SDLC | STLC | Agile | Scrum | Kanban | Waterfall

Tools & Languages:JIRA | Trello | Bugzilla | Postman | GitHub | Microsoft Excel | Google Sheets | SQL | Python (Basic) | Java (Basic)

PROJECT WORK / EXPERIENCE

Academic Project – OrangeHRM Web Application (Manual Testing) Dec 2025 – Present

Role: QA Manual Tester | Domain: HRMS (Human Resource Management System)

- Analyzed the OrangeHRM web application to understand end-to-end business workflows across multiple modules including Leave Management, Employee Records, and prepared HLR documentation
- Performed Smoke Testing and Sanity Testing on new builds to ensure environment stability before full regression cycles.
- Designed 60+ Test Cases covering Positive and Negative Testing, Equivalence Partitioning to ensure full functional coverage.
- Executed Test Scenarios and validated expected vs. actual results with severity and priority classification.

Project 2 – REST API Testing | Student Management API (json-server + Postman) April 2026 – Present

Role: API Tester | Domain: Student Management System) Tools: Postman, json-server

- Built and tested a RESTful Student Management API using json-server as a mock backend. Designed and executed API test cases in Postman covering all CRUD operations, JSON response validation, and HTTP status code verification.
- Set up a local REST API server using json-server on PORT 3000 with student.json as the data source — exposing endpoints: /students and /meta for structured API testing.

EDUCATION

Bachelor of Technology – Information Technology

Marwadi University, Rajkot, Gujarat | 2022 – 2026

Higher Secondary Certificate (Science)

Shree Swaminarayan Gurukul | 2020 – 2022

Secondary School Certificate (Matriculation)

Shree Swaminarayan Gurukul | 2019 – 2020

CERTIFICATIONS & TRAINING

Software Tester QA – Manual & Automation Testing (Ongoing) 2026 – Present

TOPS Technologies Pvt. Ltd., Rajkot

Database Programming with SQL | Oracle Academy

Python for Data Science | IBM

Java Programming | Oracle Academy

WORKSHOPS & ACHIEVEMENTS

- 36-Hour Hackathon – Code Carnival (Jan 2024): Developed an IoT-based Underground Water Leakage Detection System; secured 3rd Rank among 136 teams.
- Served as Food Committee Member at Marwadi University (Year 1 & 2), demonstrating team collaboration and organizational skills.

SOFT SKILLS

Attention to Detail | Analytical Thinking | Team Collaboration | Time Management | Written Communication

LANGUAGES

English | Hindi | Gujarati (Native)
